Dear Parents and Carers,

We have been informed that a number of children who attend St. Francis' PS Aghaderg have been diagnosed with scarlet fever. The Public Health Agency have advised that because of increased rates Group A streptococcus in the community compared to what is usually seen at this time of year, that it is not unexpected that schools and early years settings will see cases.

The Public Health Agency has provided the enclosed information leaflet for parents and guardians. I would encourage to read it as it contains useful information about the scarlet fever and other infections caused by Group A streptococcus.

If your child is unwell, they should not attend school or early years settings.

If your child is diagnosed with scarlet fever they should stay at home and not attend school or early years settings for at least 24 hours after starting the antibiotic treatment, to avoid spreading the infection. If your child is still feeling unwell beyond this minimum period and needs to take further time off, we understand. Please keep your child's class teacher informed via Seesaw or email mconlon829@c2ken.net

Further information about scarlet fever is available on the PHA website: <https://www.publichealth.hscni.net/news/scarlet-fever> and <http://pha.site/scarlet-fever-2022> and also on NI Direct <https://www.nidirect.gov.uk/conditions/scarlet-fever>

Thank you.

S. McKeown

Principal
